Wyoming Eclipse 2017 Signs & Wonders

Prophecy, Signs, Wonders, and the Eclipse of 2017

2017 follows the years of 2014, 2015 for important events that are revealed in the heavens and all on earth can have a chance to know and understand the meaning of such things. Will this phenomenon be a harbinger of things to come this year?

Path of the 2017 eclipse across the USA: [NASA Image](#)

"The people who I've talked to who have seen a total eclipse say it's a lot more than just interesting, "It's a phenomena. The animals react to it; the temperature drops 15 to 20 degrees. It gets as dark as night," Dr. Spencer Buckner, an associate professor of physics and astronomy at [Austin Peay](#)

Events, Prophecy, and History

Act 2:19-22

(19) And **I will shew wonders in heaven above, and signs in the earth beneath**; blood, and fire,

and vapour of smoke:

(20) The **sun shall be turned into darkness**, and the moon into blood, before that great and notable day of the Lord come

This year's Eclipse falls on the eve of the New moon, Elul, which will begin on the evening of the 22nd. Scripture is full of prophecy regarding wonders in heaven, signs in the earth, sun turning to darkness, and the moon turning to blood. Along with the event being a major one this year, it is not unusual to see natural events in human history tied to such things. The question is this. Will this year's Eclipse that will cross the United States from the west coast to the east be a harbinger of prophetic human events that will occur in the earth? There is no doubt; the last major full eclipse of the sun that went from the West coast to the east happened just less than 100 years ago and great events occurred on that date!

One thing of note, April 11th signals the Pink Moon and another item of note that shows signs and wonders do appear in the heavens on a regular basis. But the events of such things are not to just be ignored, especially if they have historic connections and biblical foundations closely related to them.

April's Full Moon, Full Pink Moon, heralds the appearance of the moss pink, or wild ground phlox-one of the first spring flowers. It is also known as the Sprouting Grass Moon, the Egg Moon, and the Fish Moon. See all Full Moon names and their meanings. [Farmer's Almanac](#)

Eclipse History: 1918

The last time an eclipse of this magnitude was in full 'umbra' and passed from the west to the east coast was some 99 years ago. During that year Louis Armstrong married Daisy Parker, the Great War in Europe was winding down and a pandemic of epic proportions hit the world. We know of that pandemic as the [Spanish flu](#). It killed some 40 million in a matter of months. That year, as well, Manfred Albrecht Freiherr von Richthofen, the famed Red Baron of Germany was shot down and killed, Nelson Mandela was born that year on July 18, and the Boston Red Sox defeated the Chicago cubs to take the [1918 world series](#).

Today, just one year short of the century mark another famed eclipse will occur. Here in Wyoming the high plains and the open skies make for one of the best views on the planet for watching this year's famed full eclipse on August 21st, 2017. Now it was just a while back in 1979 that a total solar eclipse occurred, but such an eclipse as this one which passed literally from one coast to the other was in 1918.

A total solar eclipse occurred on June 8, 1918. The eclipse was observed by a U.S. Naval Observatory team at Baker City in Oregon. [Wikipedia: Solar Eclipse of 1918](#)

You can view the 1918 [track of the eclipse](#) as it went across the United States on the NASA Eclipse Website [see link]. To view the 2018 eclipse there is a wide swathe where the “dark shadow of the moon will pass. The [Umbra or shadow](#) will begin its journey far ‘Out in the North Pacific Ocean’ which will be almost 1,000 miles south of Alaskan Aleutian Islands. It will travel across the USA from coast to coast, a distance of “2,500” miles in just over One hour and a half. The length of the eclipse when the sun will appear completely covered will be 160 second. You can find 25 important facts on the [eclipse here](#).

Casper Wyoming Eclipse 2017

Casper Wyoming is one of twelve smaller cities in the USA which will have a well-placed shot of this historic event. The Eclipse will move [across Wyoming](#) beginning at 11:34 am MDT on August 21st, 2017 and will take just 15 minutes to cross this great state of the west.

Wyoming Solar Eclipse begins Aug 21st, Image [Travelwyoming.com](#)

Timeline Eclipse Casper Wy

Aug. 21st 2017 [Casper Wyoming timeline:](#)

10:22 the moon touches the sun's edge. Use your glasses or another filter to safely experience First Contact.

10:23-11:41 over the course of these 80 minutes, the moon appears to take an ever-growing bite from the sun as it becomes a shrinking sliver. Beads of light will shine through in certain places and disappear from others. Temperatures cool, and the sky gradually darkens from deep blue to twilight to black.

11:42 the eclipse approaches totality. As the last bit of the sun's sliver shrinks away, the corona appears, and the Bailey's bead effect begins. Beads of light dance around the sun then fade away as the final bead brightens and expands into the highly-anticipated diamond ring effect.

11:43 the eclipse reaches totality. Remove your glasses for the next magical 2 minutes and 26 seconds. Catch an inimitable look within the universe as the eclipse creates a revealing hole cut into the sky. If you can pull your eyes away from this spectacle, notice the orange horizon that surrounds you. Most of all, appreciate this incredible but evanescent phenomenon.

11:45 totality ends. Put your glasses back on to see the moon's journey back across the sun.

1:09 the moon is completely out of the sun's shadow and the remnants of the total eclipse flame out as quickly as they flew in.

Wyoming Eclipse Interactive Map

[XXX Put interactive Wyoming Eclipse Map here XXX]

Casper Eclipse 1918 details:

In the Casper, Wyoming area the eclipse in its totality will be 146 seconds long. Festivities and activities will lead up to the eclipse. Two major events, the 2017 ASTROCON will be held at the Parkway Plaza Hotel and the Casper Eclipse festival with events listed all over the area. In Casper where there are only about 50,000 residents, the [police are gearing up](#) for the crowds which are estimated to range from 20,000-50,000 thousand people.

"The biggest concern is the influx of people, 50,000 in Natrona County and they're predicting maybe up to a half-a-million or 500,000 for the state of Wyoming. We have very limited law enforcement, fire, medical resources and to deal with the influx of people from literally from all

over the world that will be coming across the state.” - Stu Anderson, [Natrona County Emergency Management](#).

The event also will be big around the viewing area crossing Wyoming. This is true for the National Guard camp at [Gurnsey Wyoming](#). It is here that Students and scientists will be gathered for the event, with one group with the NASA sponsored program “Colorado Space Grant Consortium” who will work to launch a balloon and payload that will capture images and video of the event.

“It’s right in the path of totality,” he explained. “The eclipse runs right through this location. It’s nice open space, and great to do a balloon launch and great for the number of people who will want to come see an eclipse. Our goal is to be able to use this footage to show the public what it looks like.” [Chris Koehler](#) of CSGC

The only Customs and Border immigration officer for Wyoming, [Dale Leatham](#) has said that he has had calls from South Africa, Bahamas, Indonesia, Saudi Arabia, and from 14 other countries as well. All are interested in coming to Casper Wyoming to view the 2017 eclipse. Because Casper has an international airport, direct flights to this city are available. This makes the city a hub for such international travelers who follow such events.

Here the people and businesses have been gearing up for the crowds expected. The motels and hotels in the area are booked, with [some estimates](#) saying a few are left. But the truth is those who follow these events booked a long time ago. There are homes that are renting out rooms, camping sites available, and maybe a few places to park your RV at Walmart or Sam’s; if you are lucky enough. There is no doubt that this will be one hard week to get around in the Casper area. Also of concern is safety, for with such events and crowds there are those who come along for the ride to steal or pilfer what they can. In addition, these events can bring the threat of terrorism.

Seven important safety tips for major events like the Eclipse of 2017

1. Viewing: Be sure to get Eclipse glasses before trying to watch the eclipse
2. Resources: If coming to our area, call one of the available resources below to help you
3. Preparedness: It is cold in Wyoming in the spring, fall, and winter, so be prepared. It is also Hot in the summer.
4. Security: Be on guard when coming to such events and know to be aware of your surroundings.
5. Safety: Try to travel or be in a group of those you know. If traveling alone be careful. It is always safer to travel in a pair at least
6. Stores: Be sure to bring with you extra blankets, coats, food, water, first aid; just in case.

7. Contacts: Be sure you leave with your friends and loved ones with your contact information and where you will be at all times, in case of emergency.

Scriptures: Great Signs, Fearful sights

Luk 21:11

(11) And great earthquakes shall be in divers places, and famines, and pestilences; and **fearful sights and great signs shall there be from heaven.**

Luk 21:25

(25) And **there shall be signs in the sun, and in the moon, and in the stars;** and upon the earth distress of nations, with perplexity; the sea and the waves roaring;

Act 2:19-22

(19) And **I will shew wonders in heaven above, and signs in the earth beneath;** blood, and fire, and vapour of smoke:

(20) The **sun shall be turned into darkness,** and the moon into blood, before that great and notable day of the Lord come:

(21) And it shall come to pass, *that* whosoever shall call on the name of the Lord shall be saved.

(22) Ye men of Israel, hear these words; Jesus of Nazareth, a man approved of God among you by miracles and wonders and signs, which God did by him in the midst of you, as ye yourselves also know:

Human Events and Signs in the heavens

These are the days when we shall see signs in the heavens and in the earth. As we progress towards the very end of the end of days we shall see more. These signs point to the very prophecies coming true and those things which are written in the book. The last major signs we had were the double blood moons during 2014 and 2015 which occurred those years on the spring and fall feasts of the LORD. It also was a foretelling of major events to come. Those events were the major persecution and death of Christians and others as ISIS moved through Syria into Iraq and elsewhere. To date 2014 signaled the change in many things prophetically. Most important of those was the change in persecution of Christians. More blood has been shed since that time than in recent memory. Many believe that the Christians killed,

imprisoned, and left homeless is greater than at any time in history. When we speak of the double blood moons occurring during the feasts in the spring and fall of the aforementioned two year time span, it is definitely connected to human events. In short, we find that the Lord gives us signs in the heavens during the great events change in the earth.

Today, this eclipse is the first such to move from coast to coast since 1918. It was in 1918 that we had major events occurring. Of such the Great War was winding down and the Spanish flu epidemic occurred. Both of those events are connected with millions of death's in the earth. This year is the year of Jubilee for Israel. In addition the USA faces Russia, China, and North Korea as those who threaten the US over its policing of the world. The recent strikes in Syria by the Trump administration have pushed the status of major conflict to the forefront. In addition continued chaos and demonstrations in the US cities are ongoing. Terrorism has not gone away and with the recent terror strikes in the UK and in Sweden, it is clear; lawlessness is in full gear today.

The eclipse is a prophetic sign of the end of days, as it meets the criteria for signs in the heavens above. It also is connected with the signs of the sun and the moon. All of these are mentioned in scripture and when we see these signs it signals the end of days, time of the end, and the coming great Day of Judgment in the earth. Now while many of these events are some time off, it is also clear from this that it could indeed signal a great change in the earth along with some great event or catastrophe or even world war that is close on the horizon. With this being the year of Jubilee for Israel, it could definitely signal some change for Israel and those closely connected to Israel, like America [since we have this close viewing of the eclipse, the first such in almost 100 years]. In Israel there have been major signals of war this year and if so; it is being warned that it could mean lots of deaths. But, this could just be a sign in the heavens and not have such catastrophic event follow it. But the fact that we have such things follow these events, we need to be prepared.

Luk 21:34-36

(34) **And take heed to yourselves, lest at any time your hearts be overcharged with surfeiting, and drunkenness, and cares of this life, and so that day come upon you unawares.**

(35) **For as a snare shall it come on all them that dwell on the face of the whole earth.**

(36) **Watch ye therefore, and pray always, that ye may be accounted worthy to escape all these things that shall come to pass, and to stand before the Son of man.**

Scientists and others follow such events all the time and many do not see biblical prophecy connected to them. In addition, the connection of such events to human events is seen a mere

coincidence. Now while eclipses happen regularly and nothing of extra-ordinary occurs, when something comes along that is a hundred year event; we sit up and take note. While this is a 99 year event, that is close enough. We look and watch, observing both the event, scripture, and those things occurring in the earth. All three this time agree that we are in perilous times and prophecy is warning us about all this and what we should be doing to prepare ourselves and our families. Therefore, take care; my friends. Watch and pray that you would be counted worthy to escape all these things that will come to pass and to stand before the Son of man!

In short, there are detrimental prophecies that will come to pass. There will be judgment in the earth and the Lord God is shaking all things. All things will be fulfilled that are written in the book.

What it does signal for mankind is that there is a God in the heavens who directs all this. It is time to take these signs as a warning. Therefore, take time to seek the LORD and repent before him and follow him.

Shalom,

The Watchman Dana G Smith

Joe 2:10

(10) The earth shall quake before them; the **heavens shall tremble: the sun and the moon shall be dark, and the stars shall withdraw their shining:**

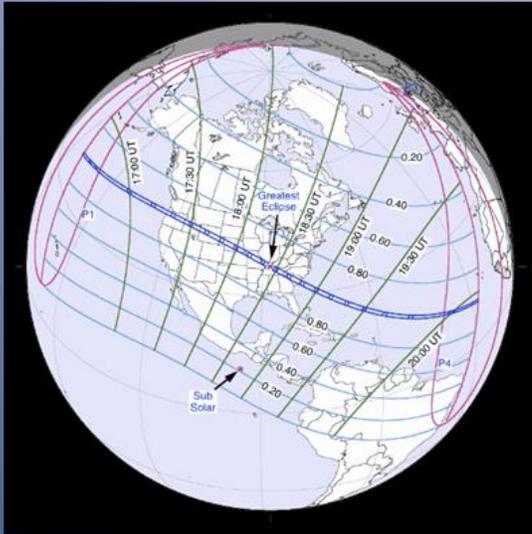

Isa 13:10

(10) For **the stars of heaven and the constellations thereof shall not give their light: the sun shall be darkened in his going forth, and the moon shall not cause her light to shine.**
